PROFESSIONAL SUMMARY

Final-year B.E. Computer Science student (Expected: May 2027) at Panimalar Engineering College, Anna University. Builds full-stack applications with Java, Spring Boot, and React.js — REST APIs with Spring Data JPA on the backend, responsive single-page UIs on the frontend. Practises test-driven development with JUnit and Jest; shipped 10+ live web apps across 35+ public GitHub repositories. NASSCOM-certified Software Programmer (Java). Seeking a Software Engineer role at an IT services company or GCC.

EDUCATION

B.E. Computer Science Engineering — Panimalar Engineering College, Anna University | May 2027 | CGPA: 8.24

Class XII (CBSE) — Velammal Bodhi Campus | 2023 | 88.90%

Class X (ICSE) — Excel Central School | 2021 | 90.5%

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), SQL

Backend: Spring Boot, Spring Core, Spring Data JPA, REST APIs, Maven

Frontend: React.js, HTML5, CSS3, Responsive Design, SPA Architecture, Component-Based UI

Tools & Testing: Git, GitHub, Node.js, Vite, Webpack, Jest, JUnit, React Testing Library

Concepts: Data Structures & Algorithms (Java, JavaScript), OOP, DBMS, REST, Async Programming (fetch, async/await)

PROJECTS

Book REST API | Java 21 · Spring Boot · JPA · MySQL github.com/Hashcat07/book-rest-api

- Built a layered REST API (Controller–Service–Repository) for a book catalog with full CRUD, pagination, and search by author, title, and price range.
- Added MapStruct DTO mapping, bean validation, and global exception handling (@RestControllerAdvice → 404/409); tested the service and web layers with JUnit, Mockito, and MockMvc.

PokéMemory — React Memory Card Game | React · Vite · PokéAPI pokimemory.netlify.app

- Built a React memory game that fetches 12 randomized Pokémon per session from the PokéAPI using Promise.all; deployed on Netlify.
- Managed score and high-score with React hooks (useState, useEffect) and a Fisher–Yates shuffle each turn; added loading and error-retry states.

Battleship — Test-Driven Game | JavaScript · Jest · Webpack · Git hashcat07.github.io/battleship

- Built a Battleship game with a full Jest unit-test suite (TDD) covering ship placement, hit/miss tracking, and win detection.
- Configured Webpack bundling with ESLint and Prettier; deployed live on GitHub Pages.

INTERNSHIP

Cybersecurity Intern — Zapsters | Dec 2025 · Remote · 1 Month

- Learned the basics of Linux CLI, network security, and vulnerability assessment through guided modules.

CERTIFICATIONS

- NASSCOM — Software Programmer (Java)
- NPTEL (IIT) — Introduction to Machine Learning
- UiPath — Automation Developer Associate (RPA)
- NASSCOM — Cybersecurity Fundamentals
